Tool ACE : advanced tool calling.

2023: hallucination was a problem / grounded in general knowledge with search (complicated ["API"] with many parameters. Internal tool for an organisation for booking system will be hidden internally: → how do we solve [API]

we can only prompt an [API] → only skill that we are trained tool selection from a list.

List of tools with which an agent builder we added to the system prompt.

what skill of API do we need? → which tool or set of tools to select.

of LLM do we need →?

What is the next best action? recursively good tool.

USP? → small model can be finetuned.

LLM history → trained to ans q
→ tool calling
→ research on complex tasks

Interaction between agents don't exist

Pretraining ~~SFT~~ Alignment)
(RL)

No data existed for tool calling / or very narrow domains. & How to have a convo around tool-calls

Diversity ⇒ create a wide range of spaces that it needs to explore.
