1. Part-time during sem :

2. D-1 Visa → tougher Series A | problem

easier after

bioinfo → AI , Bangalore

3. Home Lab | Biotech Accelerator.

4. Pre-Money , th .

LCD → company works around

series A 10% 20%

750Rs | Whole documentation 1.5/2 month.

No transactions that happens in Dec

small check : 2-3 weeks

↓

150K | initially and then think

5. $ Panel of doctor / analyst

changing the dimension of reporting

Phase 2 : Foundational.

20,30 LPa

5. Salary : Employee : Std salary , Equity not there

: Co-Founder : Equity , salary less

* travel compensation

How does seed round

12

those responsible ← travel | Talk meeting company

6. Starting with B2B, clinics API customers
Bioinfo Pipeline.
6 months → totally focus on the ecosystem
generate data: ~~Rech~~ Recurring Revenue
Integrate as much data. 6-8 months
Blue points interval
clinic & services for the clinic

after that → D2C → foundational model
services to pharma
in silico side
sell research subsidiaries
drug trial
Wet lab chemical Battery → insurance & score for the insurance company
Nov 18 19
* make decision.
hospital patient monitoring
insti works different research centre
long term ← prof + founding member insti involved in the
* Priority for hospital → revenue & intervention.
Nutraceutical company give services to the

KRaman: founding
* Building the intelligence
Series A 8-10 month
exponential 2-3.5x
Equity (4-5 people initially

pHD industrial is possible.

meet the other guys.
⇒ documentation 2-3 weeks
think about it: future
→ covered by the company will pay
