## About Meesho

Meesho started with a bold idea - to make internet commerce accessible to every Indian, everywhere. A decade later, we've grown into India's largest horizontal e-commerce platform for the next billion users - but the mission hasn't changed: Democratize internet commerce for everyone.

Our name - Meri Shop - reflects who we build for: the small business owner in Bharat. Whether it's a saree seller in Surat, a reseller in Ranchi, or a first-time shopper in a Tier-3 town - we're their platform of choice. We've helped millions of sellers to go online, with zero commission, lowest logistics cost, and a deeply localized, relatable assortment that mirrors how India shops.

But we're more than just an app - we're a culture of first principles thinking, humility, and high ownership. We've built a company that moves fast, thinks long-term, and empowers people to take big bets early in their careers.

Our 10-year journey has been one of experimentation, pivots, resilience, and impact. From being India's top reseller platform to becoming the first Indian e-commerce company to turn profitable, we've done what few thought was possible - all while keeping our users and sellers at the heart of every decision.

So if you're looking to build for Bharat, solve complex problems at scale, and be part of a team that values courage over convention - Meesho is the place for you.

## About the Role: Senior Associate – Business Management Track

This is not your average entry-level job.

As a Senior Associate, you'll be thrown into the deep end from Day 1. You'll get end-to-end exposure to solving 10x problems, owning business charters, working with CXOs, and shaping strategies that directly impact millions of users and sellers across India.

You'll join one of our core business verticals, working in small, high-impact teams. You'll solve real business challenges, use data like second nature, and move at the speed of a startup. With AI as a force multiplier, expect your individual ownership to expand well beyond a traditional job title - you'll increasingly get to own outcomes end-to-end, not just a narrow slice of the problem, with the flexibility to grow deeper into business or lean into product as you go.

## What You'll Work On

You'll be mapped to one of the following tracks based on your interest and business needs:

1. **Commerce Platform**
    - Own the core marketplace flywheel — driving user acquisition, activation, and retention while strengthening the seller ecosystem and expanding categories and selection.
    - Shape strategies across discovery, pricing, and monetization to make Meesho the most affordable, personalized shopping destination for Bharat.
    - Make Meesho a trusted shopping destination through competitive pricing, a reliable marketplace, and a differentiated branded experience on Mall.
    - Power content-led discovery through creator ecosystems and inspiration-driven journeys that improve engagement, trust, and conversion.
    - Work with product, tech, and analytics to scale India's largest marketplace toward 1Bn+ users and 10M+ sellers.
2. **Fulfilment & Experience**
    - Empower every seller with a zero-loss, friction-free & predictable operating system.
    - Enable a trusted channel for users to buy without hesitation through faster delivery timelines, seamless delivery experience, and support through the post-order journey.
    - Work with product, tech, and ops teams to build the lowest-cost, reliable & efficient supply chain that enables selling everything on Meesho. (kept as-is — this is your existing track definition and already matches the BU)
3. **Financial Services**
    - Build and scale Meesho's lending business — Paylater, personal loans, and SME credit — to become India's most trusted financial partner for the masses.
    - Design credit and risk models that unlock formal credit for millions of underserved sellers and users, many for the first time.
    - Partner with product, tech, and analytics teams to grow lending AUM from ₹250 Cr today toward ₹20,000 Cr by 2030.
4. **AI Services (MAS)**
    - Build AI agents that reimagine manual, people-heavy business processes — starting with contact center services for enterprise clients.
    - Own end-to-end client outcomes — taking full accountability for resolution across voice, chat, and workflow automation.
    - Work at the frontier of India's AI-services wave across 10+ languages, always-on, building the playbook rather than inheriting one.
5. **Grocery**
    - Build the lowest-cost grocery supply chain in India, unbundling costs and unlocking latent supply to win on price.

- Design and test category, pricing, and network innovations (like the drop-point model) to make grocery structurally cheaper than every other player, online or offline.
- Scale Meesho Grocery from an early bet into India's first true e-grocery marketplace, working across category, fulfillment, and tech.

## Compensation & Perks

**Total CTC:** ₹36 LPA

- Fixed Pay: ₹15.30 L
- Variable: ₹2.7 L
- Joining Bonus (at the time of joining): ₹3 L
- Retention Bonus (end of year 1): ₹3 L
- Retention Bonus (end of year 2): ₹3 L
- Retention Bonus (end of year 3): ₹4 L
